

Listings:

APIs for the listing component:

1. To get all the product:

EndPoint: "https://multi-account.sellernext.com/home/public/connector/product/getRefineProducts"

Type: GET

Payload:

```
{
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  },
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  }
}
"count": 1
}
```

Response:

```

    }
  }
}
]
}

```

Next and prev values will be used to get next page data and prev page data eg:

Payload for next page:

```

{
  count: 1
  next:eyJjdXJzb3IiOnsiJG9pZCI6IjYzMzJhYjQzNzM2OWRiODYxNDBmNTRhZSJ9LCJwb2ludGVyIjpbeyIkb2lkIjoiNjMzMmFiNGY3MzY5ZGI4NjE0MGZiNWJlIn1dLCJ0b3RhbFBhZ2VSZWFKIjoyfQ==
  productOnly: true
}

```

Same We will send a prev key to get prev page data.

2. To get Product Count

Endpoint:

"https://multi-account.sellernext.com/home/public/connector/product/getRefineProductCount"

Type: GET

For filters we can send the filter params in payload.

```

filter[items.quantity][1]: {value}    // for inventory filter
filter[items.sku][3]: {value}          //for SKU filter

```

```

filter[tags][3]: {value}          //for tags
filter[product_type][3]: {value} //for product type
filter[brand][1]: {value}         //for vender attributes(From API)
filter[profile.profile_name][1]: {value} //for profile filter (From API)
filter[items.status][1]: {value}    //product status
filter[variant_attributes][1]: {value} //variant attributes (From API)
filter[cif_amazon_multi_activity][1]: {value} //for activity
filter[type][1]: {value}           //for type

```

For filter please [Find](#) this video link.

3. To get All profileData(For Filter):----->"connector/profile/getProfileData"
4. To get filter Attributes(For Filter)----->"connector/source/getFilterAttributes"
5. To get All status with count(Tabs Count):----->"connector/product/getStatusWiseCount"
6. To getmatch status count (to show Linking banner):----->"amazon/product/getMatchStatusCount"
7. To get last exported File Name(import Export Bulk)----->"connector/csv/exportedFileName"
Note: This api response will help to check whether a file is already exported or not in the CSV export section.
8. To get last exported File Name(import Export Bulk)----->"connector/csv/exportedFileName"
9. Sync Status(Bulk Action)

EndPoint: "https://multi-account.sellernext.com/home/public/connector/product/matchProduct"

Type:POST

Payload:

```

{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },

```

```

"source": {
  "marketplace": "shopify",
  "shopId": "507"
},
"data": {
  "matchWith": "sku"
}
}

```

10. AmazonLookup(Bulk Action)

EndPoint: "https://multi-account.sellernext.com/home/public/connector/product/searchProduct"

Type:POST

Payload:

```

{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  }
}

```

11. Export CSV

EndPoint: "https://multi-account.sellernext.com/home/public/connector/csv/exportCSV"

Payload: Payload will be varied according to the selection:

Note: "remove_last": true,

we will be sending this key if a file is already exported.

A. Current page selection:

```

{
  "dataToExport": [value selected from checkbox],
  "remove_last": true,
  "type": "current",
}

```

```
  "source_product_id": [{Source product id of 50 products}  ]
}
```

B.All Product:

```
{
  "dataToExport": [value selected from checkbox],
  "remove_last": true,
  "type": "all"
}
```

C. Selected Products : N product(n will be no of product selected):

```
{

  "dataToExport": [value selected from checkbox],
  "remove_last": true,
  "type": "current",
  "source_product_id": [{Source product id of 50 products}  ]
}
```

D. 50+ Product matching to your search

```
{
  "dataToExport": [
    "title",
    "quantity",
    "price",
    "barcode",
    "sku"
  ],
  "remove_last": true,
  "type": "filter",
  "filter": { //send whatever filters are applied in JSON format for eg.
    "items.quantity": {
```

```

        "8": "25"
      },
      "cif_amazon_multi_activity": {
        "1": "process_tags"
      },
      "type": {
        "1": "variation"
      }
    }
  }
}

```

12. Import CSV

Endpoint: "https://multi-account.sellernext.com/home/public/connector/csv/importCSV"

Payload: File

13. Sync Actions:

A. Sync Product:

Endpoint: "https://multi-account.sellernext.com/home/public/connector/product/productSync "

TYPE: "POST"

Payload:

```

{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  },
  "source_product_ids": [all selected source product id ],
  "limit": selected product count,
  "activePage": 1
}

```

B. Sync Inventory:

Endpoint: "https://multi-account.sellernext.com/home/public/connector/product/inventorySync "

TYPE: "POST"

Payload:

```
{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  },
  "source_product_ids": [selected source product id],
  "limit": selected product count,
  "activePage": 1
}
```

C. Sync Price:

Endpoint: "https://multi-account.sellernext.com/home/public/connector/product/priceSync"

TYPE: "POST"

Payload:

```
{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  }
}
```

```

    },
    "source_product_ids": [selected source product ids    ],
    "limit": selected product count,
    "activePage": 1
}

```

D. Sync Image:

Endpoint: "https://multi-account.sellernext.com/home/public/connector/product/imageSync "

TYPE: "POST"

Payload:

```

{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  },
  "source_product_ids": [selected source product ids ],
  "limit": selected product count,
  "activePage": 1
}

```

14. Upload Product:

Endpoint: "https://multi-account.sellernext.com/home/public/connector/product/upload"

Type: POST

Payload:

```

{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  },
  "source_product_ids": [selected source product ids],
}

```

```
"limit": selected product count,  
  "activePage": 1  
}
```

15. Delete Product:

Endpoint:

"https://multi-account.sellernext.com/home/public/connector/product/deleteFromMarketplace"

Type:POST

```
{  
  "target": {  
    "marketplace": "amazon",  
    "shopId": "509"  
  },  
  "source": {  
    "marketplace": "shopify",  
    "shopId": "507"  
  },  
  "source_product_ids": [selected source product ids],  
  "limit": selected product count,  
  "activePage": 1  
}
```

16. Amazon Lookup: (on select action)

Endpoint:"https://multi-account.sellernext.com/home/public/connector/product/searchProduct"

Type: POST

Payload:

```
{  
  "target": {  
    "marketplace": "amazon",  
    "shopId": "509"  
  },  
  "source": {  
    "marketplace": "shopify",  
    "shopId": "507"  
  },  
  "source_product_ids": [selected source product ids],  
  "limit": selected product count,  
  "activePage": 1  
}
```

```
}
```

Note : For Select Fifty plus products we will remove the source_product_ids data and add one key ie:

```
{
  "target": {
    "marketplace": "amazon",
    "shopId": "509"
  },
  "source": {
    "marketplace": "shopify",
    "shopId": "507"
  },
  limit: "1000",
  "activePage": 1
  profile_id: "all_products"
}
```

Required Headers:

```
Ced-Source-Id: 500
Ced-Source-Name: shopify
Ced-Target-Id: 530
